Mumbai 5 Data Center

Our Mumbai 5 Data Center is a quick 15-minute drive from Chhatrapati Shivaji International Airport.

Features and benefits

Reliable power
Hosting the headquarters of many national and global enterprises, Mumbai has become one of the largest cities — and the economic center — of India. Power failures occur less frequently than in other areas of India, making Mumbai the best location for an ICT base.

Globally consistent
Our Mumbai 5 Data Center is in compliance with our globally consistent data center standard for facilities and operations. This standard consists of more than 300 items. We provide data center services with the best quality and reliability through redundant power, air-conditioning, and communications facilities and effective security systems.

Carrier neutral
This data center has a carrier neutral policy, giving you a variety of network service providers to choose from. Cable routes and meet-me rooms are fully redundant to ensure high reliability.

International certifications
Data center operations are based on ITIL, a comprehensive guideline for IT systems management, and a variety of other international standards, and Cisco certifications. Our Mumbai 5 Data Center provides flexible and secure operational services including various managed services and remote-hands services by on-site staff.

Specifications

Power:
- Dual path
- UPS in 2N configuration
- Diesel generator in N+2 configuration
- Dual power feed to each rack
- Power supply: up to 12kVA/rack

Airconditioning:
- Air-cooling system
- N+2 configuration

Security:
- Preregistration
- Photo identification
- Integrated circuit (IC) card authentication
- Biometric authentication
- Antitailgating system

Certification:
- ISO 9001
- ISO 20000
- ISO 27001
- SAP
- PCI DSS

Other facilities:
- Meeting room
- Parking space
- Office space for customers

Mumbai
### Mumbai 6 Data Center

Our Mumbai 6 Data Center is only a 15-minute drive from Chhatrapati Shivaji International Airport, and a 30-minute drive from central Mumbai.

### Features and benefits

#### Reliable power

Hosting the headquarters of many national and global enterprises, Mumbai has become one of the largest cities — and the economic center — of India. Power failures occur less frequently than in other areas of India, making Mumbai the best location for an ICT base. High-density deployments can be easily managed due to the stable availability of power (60+ MW Tata substation in the vicinity).

#### Carrier neutral

This data center is carrier neutral with multiple fiber-paths into the facility and a wide range of telecom-carriers are available.

#### International certifications

Data center operations are based on ITIL, a comprehensive guideline for IT systems management, and a variety of other international standards, and Cisco certifications. Our Mumbai 5 Data Center provides flexible and secure operational services including various managed services and remote-hands services by on-site staff.

### Specifications

#### Power:
- Dual path
- UPS in 2N configuration
- Diesel generator in N+2 configuration
- Dual power feed to each rack
- Power supply: up to 12kVA/rack

#### Airconditioning:
- Air-cooling system
- N+2 configuration

#### Security:
- Preregistration
- Photo identification
- Integrated circuit (IC) card authentication
- Biometric authentication
- Antitailgating system

#### Certification:
- ISO 9001
- ISO 20000
- ISO 27001
- SAP
- PCI DSS

### Other facilities:
- Meeting room
- Parking space
- Office space for customers
Bangalore 2 Data Center

Our Bangalore 2 Data Center is a 2-hour drive from Bengaluru International Airport.

Features and benefits

Purpose-built
Bangalore is considered the 'Silicon Valley of India' and demand for data center services is rapidly growing due to business expansion of both domestic and international IT, manufacturing, and logistics companies. The Bangalore 2 Data Center was built specifically to meet these needs.

Highly scalable
Our Bangalore 2 Data Center holds the largest scale server room area in Bangalore. The server room is 4,600m² (approximately 1,400 racks), providing a flexible and scalable response to demands for system expansion. We provide highly-reliable services with fully redundant power, airconditioning, communications facilities, and robust security systems.

Carrier neutral
This data center is carrier-neutral, providing a variety of network services by different carriers. This gives you the flexibility to construct a network environment with network service provider redundancy to improve business continuity planning (BCP).

Specifications

Power:
- Dual path
- UPS in 2N configuration
- Diesel generator in N+1 configuration
- Dual power feed to each rack
- Power supply: up to 12kVA/rack

Airconditioning:
- Air-cooling system
- N+1 configuration

Security:
- Preregistration
- Photo identification
- Integrated circuit (IC) card authentication
- Biometric authentication
- Antitailgating system

Certification:
- ISO 9001
- ISO 20000
- ISO 27001
- PCI DSS
- TIA-942 Tier 3
- SAP
- LEED Gold certified

Other facilities:
- Meeting room
- Parking space
- Office space for customers

Bangalore 3 Data Center

Our Bangalore 3 Data Center is a 1-hour drive from Kempegowda International Airport.

Features and benefits

Power stability
Bangalore is considered the ‘Silicon Valley of India’ and demand for data center services is rapidly growing due to business expansion of both domestic and international IT, manufacturing, and logistics companies. High-density deployments can be easily managed due to the stable availability of power.

Carrier neutral
This data center is carrier neutral with multiple fiber-paths into the facility and a wide range of telecom-carriers are available.

Highly scalable
Huge deployments are possible due to the availability of ample space and power in the building. The total server space is approximately 5,700m² (about 1,500 racks), with the ability to upgrade the power supply by up to 15kVA.

Specifications

**Power:**
- Dual path
- UPS in 2N configuration
- Diesel generator in N+2 configuration
- Dual power feed to each rack
- Power supply: up to 6kVA/rack

**Airconditioning:**
- Air-cooling system
- N+2 configuration

**Security:**
- Preregistration
- Photo identification
- Integrated circuit (IC) card authentication
- Biometric authentication
- Antitailgating system

**Certification:**
- ISO 9001
- ISO 20000
- ISO 27001
- TIA942 Tier 3
- PCI DSS (planned)

**Other facilities:**
- Meeting room
- Parking space
- Office space for customers
- Storage area
- Media room

Location

![Location Map]
**Noida 1 Data Center**

Our Noida 1 Data Center is a 1-hour drive from Indira Gandhi International Airport, and a 45-minute drive from the nearest train station.

**Features and benefits**

*Purpose-built*

Our Noida 1 Data Center is a large-scale, purpose-built data center with a total building area of over 14,000m².

*Highest power uptime*

To ensure the highest possible level of power uptime, 'express feeders' have been brought to the facility at high voltage levels from nearby substations.

*Energy efficient*

This data center has received the LEED Gold certification for its energy efficient, green design by implementing all the learnings and best practices of Chennai 1.

*Carrier neutral*

We offer you complete freedom to choose the telecom carrier your prefer to connect their hosted applications to your branches, retails outlets, warehouses, factories, and business associates.

**Specifications**

**Power:**
- Dual path
- UPS in N+1 or 2(N+1) configuration
- Gas turbine generator in N+1 configuration
- Dual power feed to each rack
- Power supply: up to 4kVA/rack

**Airconditioning:**
- Air-cooling system
- N+1 configuration

**Security:**
- Preregistration
- Photo identification
- Integrated circuit (IC) card authentication
- Biometric authentication
- Antitailgating system

**Certification:**
- ISO 9001
- ISO 14000
- ISO 20000
- ISO 27001
- ISO 22301
- Privacy mark (JIS Q 15001)
- COPC-2000 certified

**Other facilities:**
- Meeting room
- Office space for customers
