Bangkok 2 Data Center

Our Bangkok 2 Data Center is a 50-minute drive from Suvarnabhumi International Airport.

Features and benefits

Low-risk location

Our Bangkok 2 Data Center is located in the Amata Nakorn industrial area, 4km away from the closest river, and 7km away from the Gulf of Thailand. The area has a low risk of being affected by natural disasters. It's also less subject to political demonstrations.

First in Thailand

Bangkok 2 is the first purpose-built data center in Thailand. It has a total floor area of 9,600m² (approximately 1,500 racks). All the facilities are fully redundant in 2N configuration, and the facility configurations are flexibly customizable to meet a variety of needs.

BCP Annex

This data center includes office space for use during business continuity planning (BCP).
